

## Project Demo Planning

|               |                                                             |
|---------------|-------------------------------------------------------------|
| Date          | 30 June 2026                                                |
| Team ID       | XXXXXX                                                      |
| Project Name  | OptiCrop: Smart Agricultural Production Optimization Engine |
| Maximum Marks | 1 Mark                                                      |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section       | Description                                              | Duration (mins) | Responsible Member  |
|------|--------------------|----------------------------------------------------------|-----------------|---------------------|
| 1    | Introduction       | Introduce the project, objectives, and problem statement | 1               | Dimple Kumar Jagili |
| 2    | Solution Overview  | Explain architecture, ML model, and technology stack     | 1               | Dimple Kumar Jagili |
| 3    | Live Demonstration | Show the application, enter inputs, and predict crop     | 1               | Dimple Kumar Jagili |
| 4    | GitHub Repository  | Show repository structure and documentation              | 1               | Dimple Kumar Jagili |
| 5    | Demo Video Summary | Summarize features and project outcomes                  | 1               | Dimple Kumar Jagili |
| 6    | Conclusion         | Future scope and closing remarks                         | 1               | Dimple Kumar Jagili |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                  |
|------|----------------------------------|------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Explain the need for AI-based crop recommendation                      |
| 2    | Solution Overview                | Briefly describe React, Flask, and Random Forest model                 |
| 3    | Live Feature Demonstration       | Show prediction form, enter sample values, display crop recommendation |
| 4    | Q&A Session                      | Answer questions and conclude the demonstration                        |
