Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to grow the most profitable crop. • I need accurate farming recommendations. • I want to reduce crop losses.	THINKS • Which crop is suitable for my soil? • Will rainfall affect production? • Can AI improve my farming decisions?
PERSONA NAME: Ramesh Farmer	
DOES • Tests soil nutrients. • Monitors weather conditions. • Searches for farming recommendations.	FEELS • Confused while choosing crops. • Concerned about investment losses. • Confident when receiving data-driven recommendations.
